

1	<b>STEPPER TYPE</b>	123	..Rollers engage toothed wheel or frame
2	.Cam positioned		
3	.Having plural link connector elements	19	<b>SINGLE WHEEL TYPE</b>
4	.Feet attached to rim	20	<b>WHEEL ON TOP OF UPPER TRACK RUN</b>
5	..Spring biased	124	<b>WITH TRACK SUPPORT INTERMEDIATE OF END WHEELS</b>
6	<b>RIGID PORTABLE TRACK</b>	125	..Including end wheel support for movement to maintain track tension
7	.Circular		
8	<b>WITH RAIL ENGAGING MEANS</b>	126	..Intermediate support includes wheel contacting upper and lower track runs
9	<b>WITH BRAKE</b>	127	..Including elongated slide or frame support
100	<b>WITH MEANS TO REMOVE OR EXCLUDE FOREIGN MATTER (E.G., SEAL, SCRAPER)</b>	128	..Combined with at least one intermediate roller
101	.With means between track links or shoes	129	..With roller support contacting lower track run
102	.With peripheral seal between bushing and track link	130	..With frame-mounted rollers
103	.With end seal between bushing and track link	131	...Adjustable or movable frame
104	..And at connector pin	132	..With roller support mounted for movement individually or in pairs
105	.With seal between connector pin and bushing	133	...Including individual roller mounted for movement at end of arm
106	.With seal between connector pin and track link		
107	.With deflector plate, track guide means, or scraper	134	...Including walking beam or pivoting arm
108	..With deflector or guard mounted to track body	135	..With high drive arrangement
109	..With deflector plate mounted to lateral side of track	136	..Specific roller structure, per se
110	..With scraper mounted to scrape track or wheel	137	...Including structure to engage track (e.g., wear surface, cushion)
111	.With self-cleaning tread or track unit	138	..With roller mounting means
112	..Including self-cleaning endless belt	139	..With intermediate upper track run support
113	..Having openings through side or base of shoe or link	140	..With endless roller chain support
114	..With particular shoe, lug, grouser structure, or material	141	..With vertically movable wheel support
115	.With self-cleaning sprocket or drive wheel	142	..With plural wheel support
116	<b>TRACK GUIDE OR ALIGNMENT MECHANISM</b>	143	<b>WITH MEANS FOR TENSIONING TRACK BY MOVING AT LEAST ONE ENDWHEEL</b>
117	<b>WITH LUBRICATION</b>		
118	.Including passage in connector pin	144	..Condition responsive (e.g., inclination, speed, operator command)
119	.Including passage in or for roller structure	145	..Having hydraulic adjusting means
15	<b>COMBINED OR CONVERTIBLE</b>	146	..Including spring device (e.g., coil spring)
120	<b>WITH FRAME CARRIED ENDLESS TRACK</b>	147	...Coil spring housed within hydraulic cylinder
121	.With roller antifriction means	148	..Including gas recoil
122	..Track carried		

149	..With vent or relief valve	176	....Portion of resilient belt overlaps core bar (e.g., roller engagement surface)
150	.Vertically movable endwheel		
151	.Biased by spring only		
152	..Longitudinally outwardly biased by coil spring only	177	...Including core bar reinforcement
153	.Longitudinally adjustable	178	..With integral grouser
154	..Including threaded tension adjuster	179	...With reinforcement in or at grouser formation
155	..With intermediate support member (e.g., linkage)	180	..With removable lug or grouser
156	.Tensioner contained within idler wheel	181	..Grouser connects plural adjacent belts
33	<b>WITH INTERPOSED FRICTION DRIVE BELT</b>	182	..Including discrete connector to connect opposite belt ends
34	<b>INFLATABLE MEANS</b>	183	..With connecting means for reinforcement elements
157	<b>ENDLESS BELT HAVING NONMETALLIC TRACK OR TREAD</b>	184	..With friction drive structure
158	.Track formed of flexible sections	40	.Cable connected treads
159	.Track formed of rigid nonmetallic links	41	.Resilient connection between treads
160	..Lug, shoe, or grouser structure, per se	42	..Torsion bushing
161	...With mounting means	43	..Resilient compressible hinge
162	....Including threaded fastening means	44	.Steerable
163	..With noncylindrical or hollow connector pin	45	.Adjustable connection between treads
164	..Including metal sleeve for connector pin	46	..With resiliently biased ground engaging portion
165	.Track formed of endless flexible belt	47	..With sag prevention means
166	..Including plural layers of different materials	48	..Projecting truss type
167	..With metallic embedded reinforcement	49	...Truss interconnected
168	...Including clip for snowmobile track	50	.Track treads interconnected without separate fastening means
169	...Including means for sprocket tooth engagement (e.g., lug aperture)	51	..With street plate
170	...Reinforcement is endless	52	..With roller means
171	....Including core bar reinforcement	53	.One piece track tread
172	.....With overlapping core bar sections	186	.Having master link
173	.....Including sprocket wheel or roller guide lug or projection	187	..With detachable grouser for endless chain track
174	.....Plural lugs or projections	188	..Including additional locking means to eliminate stress concentration
175	.....Including additional reinforcement for sprocket wheel	189	..Including nonmetallic part or component
		190	..Reversible
		191	..Grouser structure, per se
		192	...Specific material (e.g., hardness, welding, method of manufacture)
		193	..With guide means for interfitting with sprocket wheel or roller

- 194 ..Track wheel wear protection  
(e.g., track element protection)
- 195 ..Sprocket and track engagement
- 196 ...Track formed of rigid links
- 197 ....Having nonmetallic part or component (e.g., at area of engagement)
- 198 ....Link or shoe structure, per se
- 199 ...Sprocket wheel structure, per se
- 200 ..Track formed of rigid links
- 201 ...Link or shoe structure, per se
- 202 .Separate transverse connector pin between treads
- 203 ..Including nonmetallic part or component
- 204 ..Including additional locking member for retaining link connectors (e.g., pin connectors)
- 59 ..Including noncylindrical or hollow connector pin
